Data Sources and Notes

Focus or full virtual charter schools were removed from the district's indicators. Also, charter schools that are eligible and stated an intention to apply for funding have been removed from the district totals and have their own data sheet(s).

English Learners: Students reported in the English Learner collection with a EL Record Type Code not in 3H, 5M, 5F, or 2J for that year.

Students Experiencing Homelessness: Students reported at any point in that year in the McKinney Vento Data Collection.

Students Experiencing Poverty: Students reported as economically disadvantaged in the Cumulative ADM data collection (EconDsvntgFg='y') for that year.

Students with Disabilities: Students reported as experiencing a disability in the Cumulative ADM data collection (SpEdFg='y') for that year.

Underserved Race/Ethnicity: Historically Underserved Races and Ethnicities are an aggregation of all Black or African American Students, Hispanic/ Latino/Latina Students, Native American or Alaska Native Students, and Native Hawaiian or Pacific Islander Students.

Four Year Adjusted Cohort Graduation Rate

The Four Year Adjusted Cohort Graduation and Five Year Adjusted Cohort Completion data comes from the cumulative ADM collection. A cohort graduation or completer rate follows the students who are first-time high school students in a particular year and determines the percentage that graduate within four years or complete within five years. The cohort of first-time high school students is adjusted by adding in those students who transfer into the school during the period being measured, and removed those students who transfer out of the school. Students are flagged as Graduates if they earn a standard or modified diploma by August four years after their high school entry year.

Five Year Adjusted Cohort Completer Rate

The Four Year Adjusted Cohort Graduation and Five Year Adjusted Cohort Completion data comes from the cumulative ADM collection. A cohort graduation or completer rate follows the students who are first-time high school students in a particular year and determines the percentage that graduate within four years or complete within five years. The cohort of first-time high school students is adjusted by adding in those students who transfer into the school during the period being measured, and removed those students who transfer out of the school. Students are flagged as Completers if they earn a standard, modified, extended, or adult high school diploma, or a GED by August five years after their high school entry year.

Third Grade Reading Proficiency Rate

Third grade reading data come from the Oregon statewide assessment for English/ Language Arts at the third grade level. Students that are considered proficient are those that met or exceeded the threshold for that year. Included students are those that participated in that district's assessment that did not attend an online charter school.

Data Sources and Notes

Ninth Grade on Track Rate

The Ninth Grade on Track data comes from the Ninth Grade on Track data collection. Students included in the calculation are those that are enrolled on the first school day in May, were enrolled for more than half the academic year within their resident institution, and are enrolled in their ninth grade year. Students are flagged as On Track if they have completed a minimum of $\frac{1}{4}$ of the credits required for graduation prior to the last day of August.

Regular Attenders (Not Chronically Absent) Rate

Regular attenders data come from the third period cumulative ADM collection. Students included in the calculation are those that were enrolled on the first school day in May, were enrolled for at least 75 days, and in a program type reported with daily attendance (not hourly). Students are flagged individually as a Regular Attender if they are present more than 90% of their enrolled days. Prior to 2016-17, the threshold was 90% or more. A rate is then created by dividing the number of Regular Attender students by the total number of students in the calculation. Students that attended an online charter school were not included in these calculations.
